CrystalPress Does it All!

Visit the Ioline website at www.ioline.com for more information, to view samples or schedule an online demonstration of the CrystalStudio

GIVE YOUR CUSTOMERS SOMETHING NEW!

Rhinestones are the newest trend in the decorated apparel industry. Now you can create custom rhinestone designs quickly and affordably with the Ioline **CrystalPress™ II**.

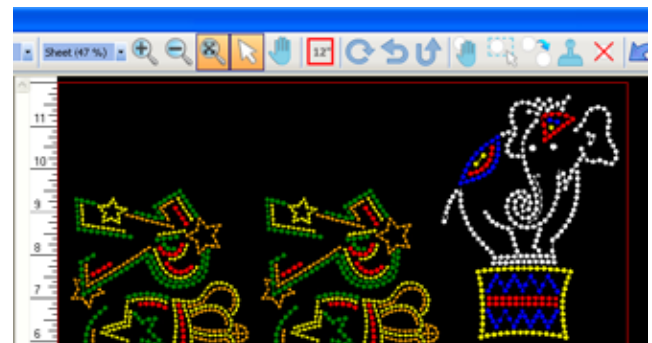

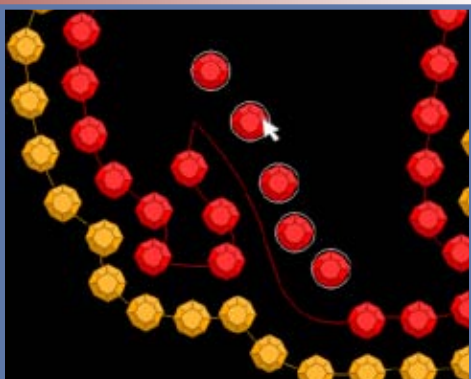

The Ioline CrystalPress™ II is an automatic rhinestone placing machine that allows you to create heat transfer motifs in a matter of minutes. Impress your customers with fresh designs found nowhere else and do it while they wait.

- **Create your motifs and see the results in minutes. No more waiting for motifs to arrive by mail or losing profit to someone else.**
- **Quickly create virtual samples that help close orders before they find your competition.**
- **Build loyalty and referrals by serving your customers in hours instead of weeks.**
- **Explore new markets and win customers with bold designs mixing Rhinestuds and Crystals.**

CrystalStudio™ Software Included!

Included with the Ioline CrystalPress™ is the **CrystalStudio™** software. It takes designs from programs like Ioline Design™, CorelDRAW®, and Adobe Illustrator® and turns them into Rhinestone transfers at the push of button. Keep working while printing on up to 4 machines at the same time.

Designed with customization in mind, edit individual crystals or entire sections with a mouse click. Add multiple designs on a single motif then mix rhinestuds and crystals together for stunning results. Making copies of the same design? CrystalStudio can fill a 30" transfer sheet doing the work for you.
